EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Vastine on 7/30/06.

The application has been amended as follows:

At the end of claim 46, --to convert said aliphatic hydrocarbons to aromatic hydrocarbon compounds-- has been inserted.

On line 2 of claim 50 and 51, "metal" has been changed to --aluminum--.

Claims 71-115 have been canceled.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process, as called for in claims 46 and 120, for production of aromatic hydrocarbon compounds by using a catalyst as called in the claims. The closest art – Chu (4,891,463) discloses a process as discussed in the previous Office action. However, Chu does not use a MFI zeolite the crystal lattice of which consists of silicon oxide and aluminum oxide and the percentage of crystallites having diameters smaller than 500 Å, namely at least 90%. One having ordinary skill in the art who studies the examples, namely examples 21+ and figures disclosed in the specification would recognize that the diameter of the crystallites actually affect to the activity of the catalyst.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
